POTASSIUM  
SULPHATE

Homogenous fertiliser, with every granule featuring both slow release nitrogen and thanks to the unique Expo® particle, extended release of potassium. Suitable for use on winter sports pitches, outfields, golf tees, approaches, fairways and amenity lawns. Particularly useful on high sand percentage rootzones prone to leaching of potassium. Designed to provide reliable, consistent results throughout the year and promote strong, stress resistant turf in the autumn. Low application rates and up to three month longevity provide excellent value for money.

Longevity	Granule Size	Cutting Height	Application Rate
10–12 weeks	1.7–2.8 mm	>14 mm	20–30 g/m <sup>2</sup>
