

TARGETED NUTRITION FOR TURF

Bullet

Phosphite

TARGETED NUTRITION FOR TURF

Contains: 37%PO₃ +20.3%K₂O
Treats: 20,000–10,000m²

Phosphite is a readily available liquid solution of potassium phosphite to assist the plant in periods of stress. Phosphite is taken up quickly and mobilised around the whole plant providing protection for new and existing growth.

Super-concentrated form of stabilised phosphite (PO₃), a potent stimulator of plant root growth. Designed to strengthen turf grass by increasing resilience, particularly during periods of high stress and pathogenic pressure.

Application:

Apply at a rate of 5–10 litres per hectare in 200–300 litres of water. Apply evenly, avoid overlapping or missing areas, using a suitable calibrated sprayer. If there is no rain within 2 days of application irrigate the treated area thoroughly. Do not apply in hot, dry weather or frosty conditions.

Half fill the sprayer with clean water. Add concentrate as required and mix thoroughly whilst adding remaining water.

Applicator	Application rate	Water volume	Pack size	Pack coverage
Boom sprayer	5–10l/ha	200–300l/ha	10l	20,000–10,000m ²
Knapsack	0.5–1.0ml/m ²	20–30ml/m ²		

Ingredient	Oxide value	Elemental value
Total nitrogen (N)		0.00% N
Phosphorus pentoxide (P ₂ O ₅)	33.10%	14.44% P
Phosphite (PO ₃)	37.00%	
Potassium oxide (K ₂ O)	20.30%	16.85% K
pH	3.0–5.0	
Nutrient analysis stated as w/v
