# DEFOAMER

**KILLS EXISTING FOAM. PREVENTS FOAM FORMATION**

Vitax Defoamer is a highly concentrated, high strength defoamer which kills foam in its tracks and prevents it reforming. Spray tank solutions may contain a variety of substances that generate foam which, if it were to overflow, might cause damage on areas not meant for these chemicals. Defoamer solves the problem by stopping the foam and preventing it from coming back. By not have foam to contend with, use of Defoamer can also speed up the filling of tanks.

#### **DIRECTIONS FOR USE**

##### **TO PREVENT FOAM FORMATION:**

Half fill the spray tank with water, add 15 to 30 ml of Defoamer whilst agitator is running to ensure even dispersion, then add the other chemicals to tank. Make up to the required volume with more water, secure the cover or lid and agitate thoroughly.

##### **TO KILL EXISTING FOAM:**

Stop tank agitation, add Defoamer across the surface of the foam. When foam starts to drop restart agitation.

#### **PRECAUTIONS**

Avoid contact with skin or eyes.

Keep out of reach of children.

In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

Keep only in original container
