

Sierraform[®] GT

K-Step

Hardens turf in autumn and winter.

6 | 0 | 27 | 2.0 | TE
N | P₂O₅ | K₂O | MgO

Description

The micro-granules contain standard-release and slow-release nitrogen and potassium, plus all essential trace elements. K-Step's low nitrogen content means compact growth and hardened turf, while its magnesium will boost colour and hide the symptoms of stress. Ideal all year round, on all fine turf.
